PROFILE

I'm Heather and I'm a Front-End Web Developer based in Toronto. I love creating beautiful-looking websites backed by equally beautiful code.

I spent the last two years as a visual merchandiser creating store and window displays, and realized I have an obsession with creating. Without any previous coding experience, I took a Ladies Learning Code workshop and was hooked. I quickly enrolled at HackerYou, taking both the part-time HTML and CSS course and Front-End Development Bootcamp.

SKILLSET

HTML5
CSS3/Sass
Responsive Design
